POE-xxi Power-Over-Ethernet

POWER-OVER-ETHERNET

Power Supply / Inserter

The POE-xxi is an advanced power supply / power inserter. The power supply is autoranging on the input and has a regulated voltage output. It has overload and short circuit protection in addition to Ethernet surge suppression built-in. The POE-xxi is not a proprietary unit. It will function with any equipment that is compliant with the IEEE 802.3af POE standards. For all "i" models, the power is supplied on ethernet pins 4/5 (V+) and 7/8 (V-). For the "iR" models, the power is supplied on Ethernet pins 4/5 (V-) and 7/8 (V+). The POE-xxi comes complete with a standard North American 115 VAC power cord. International cords are available upon request. A Current Indicator (-CI) model is available. The LED will be AMBER until >35 mA current flows to the end device which will turn the LED to GREEN. This is a good way to remotely monitor the connection between the Power-Over-Ethernet (POE) and the end device, and to indicate that the end device is turned on. To order this model, add a "-CI" suffix to the standard part number.

Using POE to power remote devices has several advantages including;

- The power supply can be centrally located where it can be attached to an uninterruptible power supply.
- The user has the ability to easily power on reset the attached equipment from a remote location.
- There is no need to run additional power cabling to the device as power can be supplied over the CAT5 ethernet cable.

FEATURES AND BENEFITS:

- "Carrier class" power over ethernet system
- Auto ranging power supply/ inserter
- Built-in Ethernet surge protection to prevent equipment damage
- Overload and short circuit protection
- Minimum cross-talk and insertion loss
- Advanced switching technology runs cool
- Powers clients which accept power on unused Ethernet pins 4,5,7,8
- FCC and CE approved
- Current indicator (CI) option available

APPLICATIONS:

- Remote routers, access points and bridges
- Remote networking equipment
- SOHO equipment
- IP camera systems
- 400 MHz to 10 GHz systems
- IP phone systems

POE-xxi Power-Over-Ethernet

Innovative **Technology** for a **Connected** World

| POE-xxi POWER SUPPLY/INJECTOR | |
|-------------------------------|--|
| Input Voltage | 90 – 264 VAC @ 47 – 63 Hz |
| Input Current | 0.3 A @ 120 VAC 0.2 A @ 230 VAC |
| Inrush Current | <15 A peak @ 120 VAC <30 A peak @ 230 VAC |
| Efficiency | 70% Min. |
| Output Voltage | POE-48i 48 VDC @ 0.35 A POE-24i 24 VDC @ 0.8 A POE-24iR 24 VDC @ 0.8 A POE-18i 18 VDC @ 0.9 A POE-12i 12 VDC @ 1.3 A |
| Output Ripple | 1% Max |
| Switching Frequency | 200KHz Typ |
| Line Regulation | +/- 0.5% |
| Load Regulation | +/- 1% |
| Operating Temperature | -10 to +60°C |
| Storage Temperature | -20 to +85°C |
| Operating Humidity | 5% to 90% non condensing |
| Size (L x W x H) | 3.25" x 3" x 1.5" (83 x 76 x 38 mm) |
| Weight | 5.2 oz (147 gm) |
| AC Connector | IEC-320 C6 (Supercom SC-14) |
| Data IN Conn. | RJ45 Shielded Socket |
| Data/POE OUT Conn. | RJ45 Shielded Socket |
| LED | (Amber) Green |
| Surge Protection | Common Mode |
| Clamping Voltage | 11 V Data, 775 V Power |
| Max Surge Discharge Current | 1200 A (8/20 uS) Power |
| Peak Pulse Current | 36 A (10/1000 uS) Data |
| Shunt Capacitance | <5 pf Data |
| Response Time | <1 nS |

| COMPLIANCE: | |
|-------------|--|
| IEEE | 802.3af POE Standard Mode B |
| EMI | EMI EN55022 (CISPR22) class B Meets CE |
| EMS | EN61000-4-2,3,4,5,6,8,11 |

SYSTEM ORDERING:

POE-48i

48 VDC @ .35 A POE Power Supply / Inserter

POE-24i

24 VDC @ .8 A POE Power Supply / Inserter

POE-18i

18 VDC @ .9 A POE Power Supply / Inserter

OF-12i

12 VDC @ 1.3 A POE Power Supply / Inserter

POE-24iR Reverse Polarity 24 VDC @ .8 A POE Power Supply / Inserter (Pins 4/5 V-, Pins 7/8 V+)

* All include AC Power Cord

NOTES:

• All shipments F.O.B. Schaumburg, IL 60173

802.3af POE Power Up Sequence

- 1. Detection Look for 802.3af compliant signature
- 2. Startup Ramp power safely
- 3. Operation Continuously monitor for short circuit or overload
